ANRI RRUMBULLAKU

Data Analyst | MSc Data Science and Society

@ anri_rrumbullaku@hotmail.com | Rotterdam, Netherlands | +31 626163057 | LinkedIn | GitHub | Portfolio

Professional Summary

MSc Data Science and Society graduate with a background in International Business Management, combining technical data analysis with practical experience across business, finance, marketing and reporting. Hands-on experience with Python, SQL, Excel, Power BI, machine learning and data visualization, including working with complex datasets, building analytical workflows and translating findings into clear business insights. Strong interest in using data to identify trends, improve processes and support evidence-based decision-making.

Core Skills

Data Analysis & BI

Python | SQL | Excel | Power BI | R | Data Visualisation | Business Reporting | Exploratory Data Analysis

Technical

Pandas | Numpy | Scikit-learn | Machine Learning | Deep Learning | Big Data | Git

Business & Analytical

Business Analysis | Performance Analysis | Problem Solving | Stakeholder Communication | Decision Support | Data-Driven Decision Making

Education

MSc Data Science and Society, Tilburg University

- Courses: Machine Learning, Deep Learning, Big Data, Interactive Data Transformation, Artificial Intelligence, Statistics, Data Processing
- Thesis: Predicting Household Financial Fragility. Predictive Modelling Using Deep Learning

BSc International Business Management, Hogeschool Rotterdam

- Courses: Finance & Accounting, Marketing, Economics, Operations & Supply Chain.

Experience

Data Analyst

Xpert Systems

Jan 2026 – Current | Tirana, Albania

- Analyse operational, financial and marketing data to identify patterns, monitor business performance and support management decision-making.
- Prepare structured insights and reporting that support planning, prioritisation and practical business decisions across day-to-day operations.

Digital Marketing

Zelfbouwcontainer

Sept 2023 – Aug 2024 | Bergschenhoek, Netherlands

- Analysed marketing performance data and trends to evaluate campaign effectiveness and support commercial decision-making.
- Prepared management reporting and collaborated across teams to translate performance findings into actionable marketing improvements.

Financial Economist Intern

Fusha

June 2023 – Aug 2023 | Tirana, Albania

- Supported bookkeeping and financial administration by organising and reviewing financial records and transactional data.
- Prepared structured financial information to support accurate reporting and improve visibility into business performance.

Social Media Marketing Manager

SABA-EAST

July 2022 – June 2023 | Tirana, Albania

- Managed digital and social-media marketing activities, including online campaigns, advertising and audience communication.
- Used campaign and engagement data to evaluate performance and support decisions on content and marketing activities.

Financial Service Department Intern

Deloitte

Sept 2021 – Jan 2022 | Tirana, Albania

- Supported financial reporting and audit-related activities by analysing and organising financial information in Excel.
- Worked with cross-functional teams to improve reporting accuracy and support audit procedures in a structured corporate environment.

Projects

Predicting Household Financial Fragility (Master's Thesis) – github.com/AnriRr/Financial-Fragility

- Developed an end-to-end analytical project using large-scale household survey data to understand and predict financial vulnerability.
- Prepared and transformed raw data, compared predictive models and translated model outputs into interpretable insights for decision-making.
- Tools: Python, Pandas, Scikit-learn, XGBoost, Machine Learning

Interactive Formula 1 Race Strategy Dashboard – GitHub repository

- Built an interactive analytics solution using Formula 1 telemetry and performance data to compare race strategies and driver performance.
- Gathered, transformed and visualised complex telemetry data to make performance patterns and strategic differences easier to understand.
- Tools: Python, Pandas, NumPy, Data Visualization, Git

Personal Portfolio – anrirr.github.io

- Portfolio website showcasing data projects, technical skills and professional experience.
- Built with HTML to provide a concise overview of projects and analytical work.
